Anti-Prostaglandin D Synthase Polyclonal Antibody

Product # PD 01 Typical Lot

Immunoglobulin

Type: Polyclonal Rabbit IgG.

Specificity: Prepared in rabbits using S-hexylglutathion affinity column purified rat hematopoietic form Prostaglandin (PG) D Synthase as the immunogen. It is specific for hematopoietic form PGD Synthase, and does not cross react with brain form of PGD Synthase.

Applications: Intended for use in Western blots, ELISA and Immunohistochemical techniques.

Recommended

Dilution: For Immunohistochemistry and Western blotting using alkaline phosphatase or horseradish peroxidase, a dilution of 1:800 is recommended. With a more sensitive detection system such as enhanced chemiluminescence or ELISA, the antibody may be diluted further.

Contents (per vial): 100 μ L of rabbit antiserum containing 0.05% sodium azide.

Storage: Stable up to a year at -20°C. and indefinitely at -80°C. Avoid repeated freeze thaw cycles.
